

Garland with LED lights

LED Light Sphere Jewels Garland

The LED Light Sphere Jewels Garland Solid Stuffing KIT consists of:

1. 10 x Transparent Peyote Ball Solid Stuffing 4 rows (Sphere Jewels): 20 halves
2. 10 LED lights on a wire with a battery container
3. A Hook for this container
4. 20 x Wire Stopper Plugs
5. A piece of plastic filament

Place the batteries (2 x CR2032 - not included) in the holder as shown in the picture.

(left = + at the top, right = - at the top)

Check if the LED lights work.

1. Prepare your beaded Sphere Jewels without the 5 top point beads.

Stuff the Sphere Jewels with the Solid Stuffing (2 halves) and zip them up.

Use the hole to string the Sphere Jewels on the LED light wire.

2.

2. The Wire Stopper Plugs come on a strip.

Before use: peel off the thin plastic base.

2.

3. Make sure the LED lights are in the centre of each Sphere Jewel (10 lights, 1 light in each Sphere Jewel).

For each of the Sphere Jewels: insert a Stopper on each side.

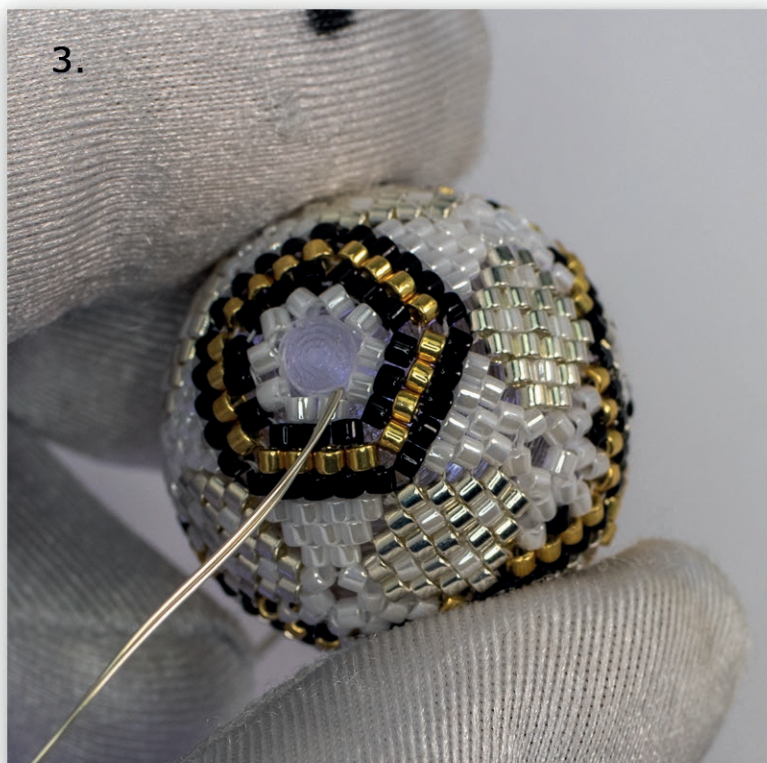

Insert the Stopper with the smallest (round) side first.

Push the Stopper in as far as possible. Use the plastic filament if necessary (see step 4).

This will prevent the wire from moving/sliding.

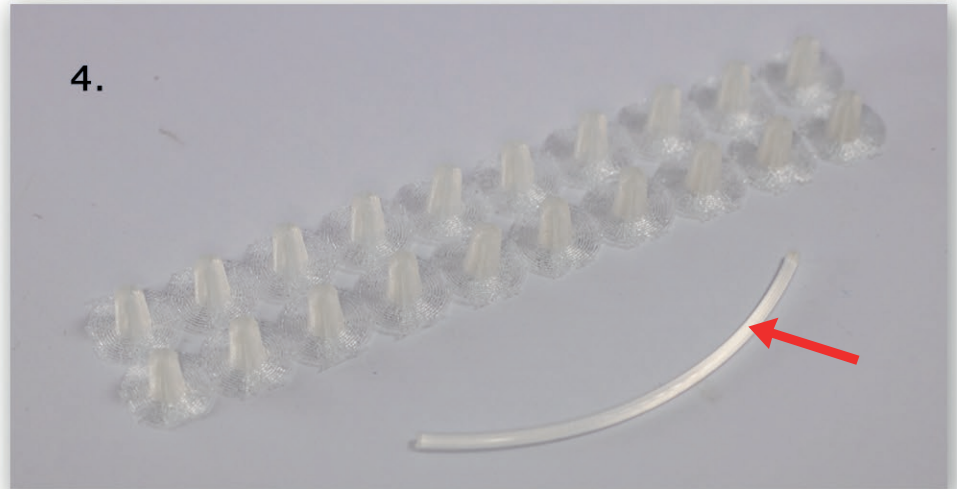

If you need to remove the Stopper: carefully pull the wire. The Stoppers will pop out.

3.

LED Light Sphere Jewels Garland

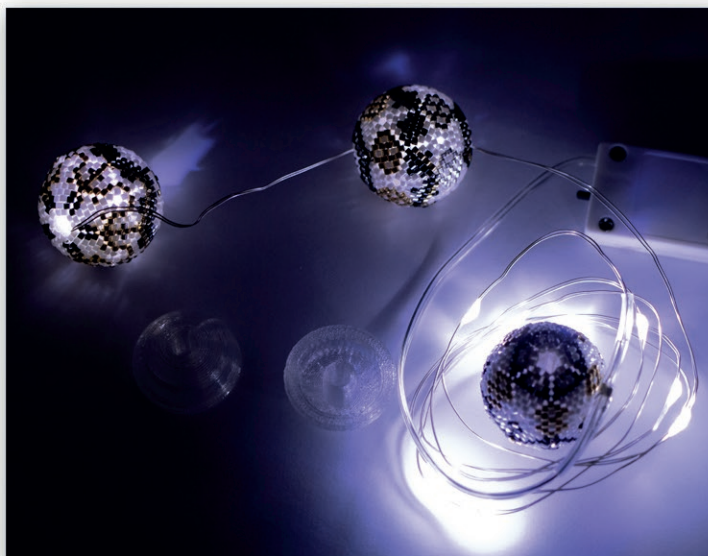

4. If needed you can use the piece of plastic filament as a tool to safely push the Stoppers in the hole.

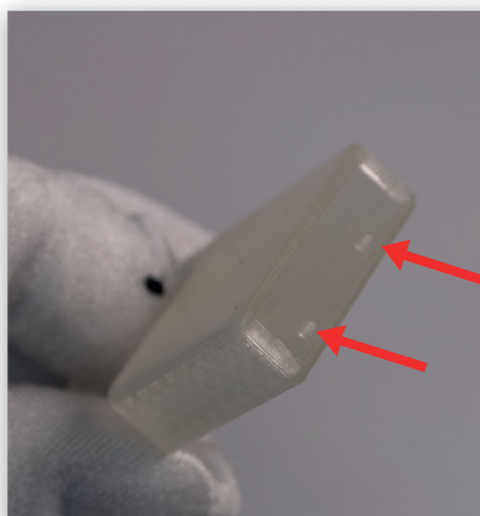

5. String all 10 Sphere Jewels on the LED lights and secure them each with a Stopper on both sides.

LED Light Sphere Jewels Garland

Inside the Batterycontainer-Hook there are two small levers.

Slide the batterycontainer in the Hook and these levers will click in the holes of the container. They are now fixed together and you can safely hang your Sphere Jewel Garland wherever you like.

If you need to replace the battery simply pull to separate the two parts.
